May 24, 2026

Dear Hiring Manager,

I am a B.Sc. Computer Science student at Laval University, and I am writing to apply for BMO's Systems Analyst, Fall 2026 (Co-op/Internship) - 4 Months role in Toronto. I am authorized to work in Canada, based in Quebec City, and available immediately. BMO's systems and analysis-focused internship is a strong fit for the mix of software, data, and process-oriented work I want to keep building.

My experience combines application development with careful, process-driven execution. At Mafhoum, I co-founded and helped architect a full-stack platform, designed 50+ REST API endpoints, and implemented React, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, JWT rotation, OAuth login flows, and Dockerized local environments. That work strengthened my ability to understand how systems fit together, move between application layers, and keep data and user flows reliable.

I also bring experience from a government-regulated environment. In my current role at Retraite Quebec, I maintain data accuracy, traceability, and compliance for sensitive client files while coordinating with cross-functional teams to resolve discrepancies on tight deadlines. I believe that combination of technical problem solving, attention to detail, and dependable follow-through would translate well to a systems analyst internship at BMO.

Thank you for your time and consideration. I would welcome the opportunity to contribute to your team with clear communication, careful execution, and a strong willingness to learn.

Sincerely,
Mohamed Slim
