Dear Hiring Manager,

I am a Computer Science student at Laval University and I am excited to apply for Diligent's Software Engineering Intern (Fall 2026) role in Vancouver. The on-site setting is appealing to me because I am open to relocating and I value the close collaboration that comes from working directly with engineering and product teams.

At Mafhoum, I co-founded and architected a full-stack community learning platform and designed more than 50 REST API endpoints across authentication, communities, courses, gamification, and payments. I also implemented Socket.IO real-time features, JWT rotation, OAuth login flows, Prisma schema modeling, and Dockerized local environments to keep the stack reliable and easy to iterate on.

In my 2023 web development internship at CHC Navigation, I shipped a client-approved responsive product showcase website and worked on pages for GNSS/GPS and topography equipment. In my current role at Retraite Québec, I work with sensitive files, data accuracy, and deadline-driven coordination every day. Those experiences have taught me to write maintainable code, move quickly without losing structure, and stay focused on quality.

I am authorized to work in Canada, available immediately, and would welcome the opportunity to contribute to Diligent's team in Vancouver.

Thank you for your time and consideration.

Sincerely,
Mohamed Slim
