Geotab Hiring Team
Oakville, ON

Dear Hiring Team,

I am writing to apply for the Embedded Developer Intern, Security position at Geotab. I am a Computer Science student at Laval University, authorized to work in Canada, and available immediately for a Fall 2026 internship in Ontario or a hybrid arrangement.

My background is strongest in building reliable software end to end. I have developed full-stack applications with React, Node.js, PostgreSQL, Redis, Socket.IO, and Docker; built authentication flows with JWT rotation and OAuth; and worked with C++, Python, SQL, and TDD-oriented practices in projects and coursework. In my internship and projects, I have shipped client-facing software, integrated APIs, and focused on maintainable implementations and clear handoffs.

Geotab stands out to me because the role combines embedded development and security within a Canadian product team. I would welcome the chance to contribute careful debugging, structured problem solving, and a strong habit of learning quickly while growing in a systems-oriented environment. Thank you for your time and consideration; I would be glad to discuss my fit for the role.

Sincerely,
Mohamed Slim
