Hiring Team
PenFinancial Credit Union
Welland, Ontario

Dear Hiring Team,

I am applying for the IT Coordinator (Co-op/Summer Student) role at PenFinancial Credit Union. I am a Computer Science student at Laval University, authorized to work in Canada, and I am interested in the position because it combines practical IT support, data clean-up, data transfer, and banking-system readiness work in a member-focused financial institution.

My background matches the data-quality and technical-support side of the role. In my current role at Retraite Quebec, I maintain data accuracy and compliance while processing sensitive client files in a regulated government environment. In my HMD Agro internship, I am integrating an existing farm-management platform by building an API-backed AI module and reporting interface, which has required careful requirements gathering, configuration, and documentation. I also have hands-on software experience with Python, JavaScript, SQL, PostgreSQL, Docker, Git, REST APIs, and full-stack web projects.

I would bring PenFinancial a detail-oriented approach to data cleanup, clear communication with non-technical stakeholders, and a willingness to learn your Microsoft and banking-system workflows quickly. I am comfortable working from fundamentals, documenting what I find, and supporting operational improvements without overstating tools I have not used professionally.

Thank you for your consideration. I would welcome the opportunity to discuss how my computer science training, data-accuracy experience, and practical software background can support PenFinancial's IT and Operations projects.

Sincerely,

Mohamed Slim
