Date: May 21, 2026

Dear Hiring Manager,

I am a B.Sc. Computer Science student at Laval University, and I am applying for Scotiabank's Velocity – Data Analyst Internship/Co-op – Fall 2026 role in Toronto. I am authorized to work in Canada and would be glad to contribute during the Fall 2026 term.

My background combines Python, SQL, Pandas, scikit-learn, and product-focused engineering. I have built a multi-agent orchestration system in Python with the Claude Agent SDK, persistent memory, and automated workflows; a macOS dictation app with local MLX Whisper transcription and Claude-based refinement; and a full-stack platform with React, Node.js, PostgreSQL, Redis, Socket.IO, Prisma, and Docker. These projects taught me how to structure data-oriented work, ship reproducible systems, and move quickly from problem definition to implementation.

The Velocity data analyst role aligns well with my interest in data cleaning, visualization, statistical analysis, machine learning, Python, SQL, UNIX tools, and Git workflows. At Retraite Quebec, I maintain data accuracy and handle sensitive files in a regulated environment, which strengthened my attention to detail and reliability. I would welcome the opportunity to contribute to Scotiabank's Toronto team and keep building stronger analytical and technical skills.

Thank you for your consideration. I would welcome the opportunity to contribute this fall.

Sincerely,

Mohamed Slim
