Dear Hiring Team,

I am a Computer Science student at Laval University and I am excited to be considered for Scotiabank's Velocity - Software Engineer Internship/Co-op - Fall 2026 role. The focus on SDLC, database knowledge, Java/JavaScript/React, and agile collaboration matches the kind of software work I have been doing in full-stack projects and internships.

At Mafhoum, I co-founded and architected a full-stack community learning platform and designed more than 50 REST API endpoints across authentication, communities, courses, gamification, and payments. I also implemented Socket.IO real-time features, JWT rotation, OAuth login flows, Prisma schema modeling, and Dockerized local environments to keep the stack reliable and easy to iterate on.

I have also shipped a client-approved product showcase website during my web development internship at CHC Navigation, and I currently work as an Administrative Technician at Retraite Québec, where I maintain accurate records and handle deadline-sensitive work in a regulated environment. Those experiences have strengthened my attention to detail, teamwork, and delivery mindset.

I am authorized to work in Canada, available immediately, and interested in the Toronto-based Velocity opportunity. I would welcome the chance to contribute to Scotiabank and continue growing as a software engineer in a student program built around learning and impact.

Thank you for your time and consideration.

Sincerely,
Mohamed Slim
