Authorized to work in Canada | Available immediately | Open to internships anywhere in Canada

SUMMARY

Computer Science student at Laval University with hands-on experience building full-stack web apps, AI-assisted tools, and automation in Python, JavaScript, and C++. Comfortable with REST APIs, WebSockets, Docker, Git, and scheduled workflows; eager to contribute to build/release automation and developer tooling.

EDUCATION

Laval University

Sept. 2023 – Present

B.Sc. in Computer Science

Quebec City, QC

Relevant coursework: Data Structures and Algorithms, Web Development, Operating Systems, Object-Oriented Programming, Machine Learning, Database Systems, Software Engineering.

EXPERIENCE

HMD Agro SA

May 18, 2026 – Aug. 15, 2026

Final Year Engineering Intern

Remote

- Integrated an existing farm-management platform by building an API-backed AI module and reporting interface for crop and dairy workflows.
- Coordinated scope with the supervisor and PDG to turn requirements into milestones, align data collection and configuration, and keep the internship on schedule.

Retraite Quebec

Jan. 2024 – Present

Administrative Technician

Quebec City, QC

- Maintain data accuracy and regulatory compliance for RRQ pension mandates in a high-volume, government-regulated environment.
- Process sensitive client files end-to-end, coordinate with cross-functional teams, and resolve discrepancies under tight deadlines.

CHC Navigation

Summer 2023

Web Developer Intern

Tunis, Tunisia

- Designed and shipped a responsive product showcase website in HTML, CSS, and JavaScript; reached production deployment and secured client approval.
- Structured technical pages for GNSS/GPS receivers and topography equipment, improving navigation and product-specification clarity.

PROJECTS

Mafhoum – React 19, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, Docker

2025 – Present

- Co-founded and architected a production-bound community learning platform; designed 50+ REST API endpoints across auth, communities, courses, gamification, and payments.
- Led product scoping and feature prioritization with a 3-person team, turning ideas into a clear roadmap and shipping sequence.
- Implemented Socket.IO real-time interactions, JWT rotation, OAuth login flows, Prisma schema modeling, and Dockerized local environments.

Multi-Agent AI Orchestrator – Python, Claude Agent SDK, Discord.py, JSONL

2026

- Built a Discord-based multi-agent system with cron jobs that trigger specialized agents for daily standups, progress checks, reviews, and handoffs.
- Added isolated prompts, JSONL history, and persistent memory to keep each role's context separated and reusable.

VoiceBubble – Python, Claude Haiku API, MLX Whisper, PyQt6, SQLite

2025 – 2026

- Built a macOS push-to-talk dictation app combining local MLX Whisper transcription with Claude-based refinement and per-app context profiles.

UTask – Vue.js, REST API, WebSockets

2024

- Implemented CRUD task boards with drag-and-drop and real-time sync, achieving full feature coverage against a Swagger/OpenAPI backend.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL, HTML/CSS

Frameworks: React 19, Vue.js, Node.js, Express.js, FastAPI, Prisma, Socket.IO, Bootstrap

Databases/Infra: PostgreSQL, Redis, SQLite, Docker, Git, Swagger/OpenAPI

AI/ML: Claude Agent SDK, LLMs, Whisper (MLX/OpenAI), Prompt Engineering, scikit-learn, Pandas, Jupyter

Concepts: REST APIs, WebSockets, JWT/OAuth, TDD, Agile/Scrum, OOP, DSA
