BMO Hiring Team
Toronto, ON

Dear Hiring Manager,

I am applying for the BMO Software Developer, Fall 2026 (Co-op/Internship) – 4 Months role in Toronto. I am a Computer Science student at Laval University with hands-on experience building full-stack web applications, REST APIs, real-time features, and AI-assisted tools using React, Node.js, Express.js, PostgreSQL, Socket.IO, Docker, and Python.

In Mafhoum, I co-founded and helped architect a production-bound community learning platform, including 50+ REST API endpoints across authentication, communities, courses, gamification, and payments. During my 2023 web developer internship at CHC Navigation, I shipped a client-approved website to production and built responsive product pages in HTML, CSS, and JavaScript. I also work in a government-regulated environment at Retraite Quebec, which has strengthened my attention to detail, reliability, and handling of sensitive information.

I am authorized to work in Canada and available immediately. I would welcome the opportunity to contribute to BMO's software team and continue growing as a developer in a collaborative environment.

Sincerely,
Mohamed Slim
