Hiring Team BMO

Re: Junior Software Developer, Fall 2026 (Co-op/Internship) - 4 Months

Dear Hiring Team,

I am writing to apply for BMO's Junior Software Developer, Fall 2026 (Co-op/Internship) - 4 Months role in Toronto. I am a Computer Science student at Laval University, authorized to work in Canada, and I have built my background around shipping full-stack software with React, Node.js, Express.js, PostgreSQL, Socket.IO, Prisma, Docker, Python, and the Claude Agent SDK.

At Mafhoum, I co-founded and architected a production-bound community learning platform and designed more than 50 REST API endpoints across authentication, communities, courses, gamification, and payments. I also implemented real-time features, JWT rotation, OAuth login flows, and Dockerized local environments. In another project, I built a Discord-based multi-agent orchestration system with persistent memory and automated workflows, which strengthened my ability to structure systems clearly and iterate quickly.

Professionally, I shipped a client-approved responsive product showcase website during my web developer internship at CHC Navigation, and I currently work as an Administrative Technician at Retraite Québec, where I maintain data accuracy and handle deadline-driven work in a regulated environment. I would welcome the opportunity to contribute those software engineering habits to BMO's team during the Fall 2026 term. I can also provide my unofficial transcript with the application.

Thank you for your time and consideration.

Sincerely,
Mohamed Slim
