Dear Hiring Manager,

I am a B.Sc. Computer Science student at Laval University, and I am writing to apply for BNP Paribas' Data Analyst Intern role in Montréal. The role is appealing because it sits at the intersection of data quality, analysis, and practical reporting work I enjoy because it turns structured data into decisions people can trust. I am authorized to work in Canada and available immediately.

My background combines Python, SQL, and careful data handling with experience in environments where accuracy matters. At Retraite Québec, I maintain data accuracy and regulatory compliance for RRQ pension mandates in a high-volume, government-regulated setting. I have also helped build an API-backed AI module and reporting interface for crop and dairy workflows at HMD Agro SA, which strengthened my habit of translating requirements into clear, usable outputs.

I would welcome the opportunity to bring that mix of data discipline, problem solving, and technical execution to BNP Paribas. Thank you for your time and consideration.

Sincerely,

Mohamed Slim
