Hiring Team
British Columbia Investment Management Corporation

Dear Hiring Team,

I am writing to apply for BCI's Enterprise Solutions, Software Engineer Co-op/Internship (Fall 2026). I am a B.Sc. Computer Science student at Laval University in Quebec City, authorized to work in Canada, and I am interested in the opportunity to support internal applications used by business clients. The posting's focus on planning and delivering complex information systems aligns well with the kind of software work I want to keep building.

My background is in building and shipping software end to end. At Mafhoum, I co-founded and helped architect a full-stack platform, designed more than 50 REST API endpoints, and implemented React, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, JWT rotation, OAuth login flows, and Dockerized local environments. In my Multi-Agent AI Orchestrator and VoiceBubble projects, I built stateful client-server workflows and AI-assisted tooling, which strengthened my habits around careful implementation, reliable interfaces, and practical delivery.

I would bring that same attention to detail to BCI's Enterprise Solutions team. My experience shipping client-approved web work at CHC Navigation and handling sensitive, high-volume administrative data at Retraite Quebec has also made me comfortable working carefully in environments where accuracy and reliability matter. Thank you for your time and consideration.

Sincerely,
Mohamed Slim
