Geotab Hiring Team
Geotab

Dear Hiring Team,

I am writing to apply for the Data Analyst Intern, Customer Success Operations role at Geotab. I am a B.Sc. Computer Science student at Laval University, authorized to work in Canada and available immediately. The posting's focus on SQL, BigQuery, data pipelines, reporting, and dashboarding is a strong match for the work I have been building across software, data, and operations.

In my current role as an Administrative Technician at Retraite Quebec, I maintain data accuracy and compliance in a high-volume, regulated environment, process sensitive client files end-to-end, and coordinate with cross-functional teams to resolve discrepancies. That experience taught me how to work carefully with operational data and how to keep records reliable under deadline pressure.

I also bring technical experience that supports analytics work. On projects such as Mafhoum and UTask, I have built systems with SQL, PostgreSQL, Python, REST APIs, and real-time workflows, while my AI and automation work has strengthened my ability to reason about data flows and tooling. I would be excited to bring that combination of accuracy, technical depth, and follow-through to Geotab's customer success operations team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background could support your team.

Sincerely,
Mohamed Slim
