Hiring Team
Hitachi

Dear Hiring Team,

I am writing to apply for the Software Analyst Intern role in Toronto. I am a B.Sc. Computer Science student at Laval University, authorized to work in Canada, and I am excited by roles that sit between requirements analysis and software delivery.

My background is centered on building reliable software end to end. At Mafhoum, I co-founded and helped architect a full-stack platform, designed more than 50 REST API endpoints, and worked across React, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, JWT rotation, OAuth login flows, and Dockerized development. In my current internship at HMD Agro SA, I am integrating an API-backed software module into an existing platform and coordinating scope into milestones, which has strengthened my habits around translating needs into practical implementation.

I would bring that same approach to Hitachi: careful problem solving, clean communication, and a focus on software that is dependable for users and teams. I have also shipped client-approved web work during my 2023 web developer internship, which taught me to stay attentive to details while moving quickly.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background could contribute to your team.

Sincerely,
Mohamed Slim
