Kinaxis Hiring Team
Ottawa, ON

Dear Hiring Team,

I am writing to apply for the Developer Co-op/Intern, Clients, Front End Technologies position at Kinaxis. I am a Computer Science student at Laval University, authorized to work in Canada, and I am interested in contributing to a client-facing engineering team in Ottawa.

My experience has centered on shipping web software end to end. I have built responsive interfaces with HTML, CSS, JavaScript, React, and Vue.js; worked on REST APIs and real-time features; and collaborated on projects that required careful implementation, iteration, and clean handoffs between components. That background has helped me develop the habits needed for front-end work: attention to detail, readable code, and a focus on how users experience the product.

I would bring that same approach to Kinaxis. The opportunity to support your Clients and Front End Technologies team is appealing because it combines user-facing software with practical engineering work, and I would welcome the chance to learn from your team while contributing meaningfully during the co-op/intern term.

Thank you for your time and consideration. I would be grateful for the opportunity to discuss how my background may fit Kinaxis.

Sincerely,
Mohamed Slim
