Dear Hiring Team at Loblaw Digital,

I am writing to apply for the Software Development - Co-op Student role in Toronto. I am a Computer Science student at Laval University, authorized to work in Canada, and available immediately. I am looking for a software development internship where I can contribute to shipped product work while continuing to grow as an engineer.

My background includes building full-stack web applications, REST APIs, authentication flows, and real-time features with React, Node.js, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, and Docker. On my Mafhoum project, I helped architect a production-bound platform by designing 50+ REST API endpoints and working across auth, communities, courses, gamification, and payments. In a 2023 web development internship, I shipped a client-approved responsive website using HTML, CSS, and JavaScript.

I would welcome the chance to bring that product-minded full-stack experience to Loblaw Digital and contribute as a co-op student on your software development team. Thank you for your time and consideration. I would be glad to discuss my background further in an interview.

Sincerely,
Mohamed Slim
