Scotiabank Velocity Hiring Team
Toronto, Ontario, Canada

Re: Velocity – Cloud Engineer Internship/Co-op – Fall 2026

Dear Hiring Team,

I am a Computer Science student at Laval University in Quebec City, and I am excited to apply for the Scotiabank Velocity Cloud Engineer Internship/Co-op for Fall 2026. I am authorized to work in Canada and available immediately.

My background is in building software that is organized, testable, and easy to ship. In my projects, I have built full-stack web applications with REST APIs, authentication flows, real-time features, Dockerized workflows, and backend systems. For example, I co-founded Mafhoum, where I designed 50+ API endpoints across auth, communities, courses, gamification, and payments, and I built a Discord-based multi-agent system that uses cron jobs, persistent memory, and role-based workflows to automate standups, progress checks, reviews, and handoffs.

I would bring the same focus on structure and reliability to a cloud engineering team. I am comfortable working across Python, JavaScript, SQL, Git, Docker, and backend APIs, and I enjoy turning requirements into practical systems that teams can maintain and extend. I also shipped a client-approved website during my 2023 web development internship, which strengthened my habit of delivering clean work on schedule.

Thank you for your time and consideration. I would welcome the opportunity to contribute to Scotiabank's Velocity team this Fall.

Sincerely,
Mohamed Slim
