May 23, 2026

Dear Hiring Manager,

I am a B.Sc. Computer Science student at Laval University, and I am writing to apply for Sun Life's Student - Full-Stack Developer - Fall 2026 role in Toronto. I am authorized to work in Canada and available immediately. The role's focus on practical software development and product delivery aligns closely with the work I have been building across full-stack web apps, APIs, and real-time features.

At Mafhoum, I co-founded and helped architect a full-stack community learning platform, designed more than 50 REST API endpoints, and implemented React, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, JWT rotation, OAuth login flows, and Dockerized local environments. That project gave me hands-on experience moving between frontend, backend, data modeling, and deployment concerns while keeping the product shippable and maintainable.

I have also shipped client-facing web work in an internship setting. At CHC Navigation, I built a responsive product showcase website in HTML, CSS, and JavaScript that reached production deployment and client approval. In my current work, I handle sensitive, high-volume administrative data in a regulated environment, which has reinforced my attention to detail, process, and steady execution.

I would welcome the opportunity to contribute to Sun Life with clean implementation, clear communication, and reliable delivery. Thank you for your time and consideration.

Sincerely,
Mohamed Slim
