Education

Laval University B.Sc. in Computer Science	Quebec City, QC Sept. 2023 - Present
• Relevant coursework: Machine Learning, Data Structures & Algorithms, OOP, Databases, Software Engineering, Web Development, Operating Systems.	

Experience

Web Developer Intern CHC Navigation (GPS & Topography Products)	Summer 2023 Tunis, Tunisia
• Built and shipped a responsive product showcase for technical GNSS/GPS and topography equipment using HTML, CSS and JavaScript; approved by client.	
• Structured technical product pages with specs, imagery and navigation, translating complex equipment information into clear user-facing content.	
• Validated desktop, tablet and mobile compatibility through systematic UI checks, reinforcing detail-oriented quality standards.	
Administrative Technician Retraite Québec	Jan. 2024 - Present Quebec City, QC
• Process high-volume client files in a regulated environment, maintaining accuracy, confidentiality and deadline discipline.	

Projects

VoiceBubble Python, Claude API, MLX Whisper, PyQt6, SQLite	2025 - 2026
• Built a macOS push-to-talk dictation app using local Whisper transcription and Claude-based refinement, integrating ML inference into a usable desktop workflow.	
• Added per-app context profiles, local persistence and automatic text insertion through macOS Accessibility APIs.	
Multi-Agent AI Orchestrator Python, Claude Agent SDK, Discord.py, JSONL	2026
• Built a Discord-based orchestration system routing messages to 10 specialized AI agents with persistent JSONL conversation history and markdown memory.	
• Automated scheduled agent workflows for standups, progress checks, reviews and handoffs, supporting an Agile process for a small team.	
Mafhoum React, Express.js, PostgreSQL, Redis, Socket.IO, Prisma, Docker	2025 - Present
• Co-architecting a full-stack learning platform with REST APIs, authentication, real-time Socket.IO features, gamification and payments.	
• Designed 50+ API endpoints and data flows, applying Agile/Scrum practices and production-oriented architecture decisions.	

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, SQL, HTML, CSS
AI / Data: Machine learning coursework, scikit-learn, Pandas, Jupyter, MLX Whisper, Claude API; ready to ramp up on PyTorch and computer vision
Software: OOP, data structures, REST APIs, WebSockets, Docker, Git, SQLite, PostgreSQL, Redis, Swagger/OpenAPI
Collaboration: Agile/Scrum, multidisciplinary teamwork, detail-oriented testing, quality and production mindset

Application Fit

- Strong match for Wabtec/Evident Canada AI software internship involving Python/C++, ML model experimentation, deployment-oriented development and Agile product collaboration.
- Legally authorized to work in Canada without sponsorship; available for Fall 2026 internship dates and open to hybrid work in Montréal.
